Prem Kumar

Ph.D. Student
The Institute of Mathematical Sciences (IMSc), Chennai, India
Website: prem314.github.io
Email: premkr@imsc.res.in, prem3141592@gmail.com

Education and Training

Ph.D. in Theoretical Physics 2021-Present
Institute of Mathematical Sciences (IMSc), Chennai, India
PhD supervisor: Prof. Sibasish Ghosh

M.Sc. in Physics 2019-2021
Institute of Mathematical Sciences (IMSc), Chennai, India
MSc project supervisor: Prof. Sibasish Ghosh

B.Sc. in Physics, Maths, Electronics 2016 - 2019
Christ (Deemed to be University), Bangalore, India

Research Highlights

- Analytical derivation of the 4th-order Time-Convolutionless (TCL4) generator for Spin-Boson models, benchmarking it against exact numerical methods. We also studied the corrections to the steady state and non-Markovianity of the dynamics. [1, 2]

- Generalized the ultra-strong coupling limit quantum mean force Gibbs state to a large class of anharmonic environments. [3]

Research Interests

- Theoretical study of open quantum systems and application to physically/experimentally relevant models like in chemical, biological or other many-body systems.

- Non-Markovian dynamics

- Tensor networks

- Quantum information theory

Pedagogical Reviews

[4] Prem Kumar. "Local harmonic approximation to quantum mean force Gibbs state". In: (2024). A unified derivation and review of the harmonic approximation method for mean force Gibbs state. arXiv: 2401.11595. URL: https://arxiv.org/abs/2401.11595.

Technical Skills

- **Computational Physics & ML:**

  - **Tensor Networks:** Implementation of algorithms for simulating open quantum system dynamics using Feynman-Vernon influence functional formalism and tensor network framework.
  - **Machine Learning: PyTorch** for machine learning and designing transformer models.
  - **Languages:** Python (QuTiP, NumPy, SciPy).

- **Symbolic Computing (Mathematica):**

  - Developed `spin-boson-tcl4`: An open-source package for the symbolic derivation and implementation of 4th-order Time-Convolutionless (TCL) master equations.

List of presentations and participations at conferences

1. Poster presentation on *"Asymptotic TCL4 Generator for the Spin-Boson Model: Analytical Derivation and Benchmarking"*, Quantum Foundations Technology and Applications (QFTA-2025), IISER Mohali, India, 4–8 December 2025.

2. Poster presentation on *"Ultrastrong coupling limit to quantum mean force Gibbs state for anharmonic environment"*, Second DPG Fall Meeting: 100 Years of Quantum Physics, Georg-August-Universität Göttingen, Germany, 8–12 September 2025.

3. Poster presentation on *"Equivalence between the second order steady state for the spin-boson model and its quantum mean force Gibbs state"*, "100 Years of Quantum Mechanics", IISER Kolkata, India, 18–21 December 2024.

4. Poster presentation on *"Ultrastrong coupling limit to quantum mean force Gibbs state for anharmonic environment"*, QCMC-24: International Conference on Quantum Communication, Measurement and Computing, IIT Madras, Chennai, India, 26–30 August 2024.

Research visits and seminars

1. *"Quantum mean force Gibbs state in weak and ultra-strong coupling limits"*, Academic visit, "Department of Mathematical Physics, Nicolaus Copernicus University, Torun, Poland", Sept 15-19,

2. Seminar on *"Equilibrium state and dynamics of an open quantum system in weak and strong coupling limits"*, Academic visit, IIT-H, May 7-9 2025.

Achievements

- JEST 2019: All India Rank 75, Percentile: 98.89

- JAM 2019: All India Rank 146, Percentile: 99.06

- During BSc, won 1st prize in State level Inter-Collegiate Fest, Jyoti Nivas College, Bangalore, February 2018 for building a 20-bit programmable computer on breadboard.
